PlotMaker 1.10.0 is ready.

PlotMaker 1.10.0 is finished and ready to run on the Intel Macintosh running the latest versions of Mac OS X. This version retains compatibility with existing **PlotMaker Panel** files and lays a solid foundation for the future. Sail Science now is up to date with the latest version of **SailMaker 1.10.2**

PlotMaker 1.10.0 is a major upgrade of **PlotMaker**, giving the Sail loft a complete package to design, nest and plot/ Cut panels on the latest Mac operating systems. This has taken far longer than anyone anticipated, and we'd like to thank you, our customers, for your patience while we've been working on this upgrade.

You can be confident that **SailMaker 1.10.2** and **Plotmaker 1.10.0** includes all the functionality of the older versions from Sail Science, and will read and write existing data files so that no design information is lost. The owners of Sail Science are also sail designers who have been testing and using this latest version of **SailMaker** and **PlotMaker** for some time discovering bugs along the way. They are now satisfied that the latest version of **PlotMaker** is ready to go.

PlotMaker 1.10.0 also includes some improvements in the appearance of the program and a new licensing scheme has been implemented. We have added a screen preview option that allows the user to view the nested panels, and by selecting the play button you can watch the order in which the panels will be plotted and cut.

Demo Request

IF you are interested and would like a copy of our demo version please contact us at: info@sailscience.com.au

System requirements
SailMaker 1.10.2 requires Snow Leopard or Higher and has been tested on Yosemite.

Note: Our e-mail addresses have changed.

The new licensing scheme in **SailMaker 1.10.2** allows you to purchase any combination of the five sail design modules with either LE or Pro level features. PatchMaker is also a licensed module. You may now upgrade your license at any time. To upgrade a SailMaker license with all modules enabled at the Pro level will cost $3,500.00 for existing **SailMaker 1.9.5** users.

Please contact us at info@sailscience.com.au to request a demo copy of the latest version of SailMaker and PlotMaker.

From the Office

PlotMaker 1.10.0 comes standard with PlotMaker ASCII Import and Export which allow all lofts to send panel files away for cutting.

NTV Export is also available and Drivers do cost extra see below.

There are 5 sail modules in **SailMaker**:

- Mainsail
- Headsail
- Spinnakers
- Gennakers
- Gaff

Each of these sail modules can be licensed independently with either the LE or Pro features enabled. You may upgrade your license at any time.

New users may choose to purchase **SailMaker** with all sail modules in **LE** mode for $5,890.00 or in **Pro** Mode for $9,950.00 this includes PatchMaker (which is now standard) and PackMaker.

For existing **SailMaker 1.9.5** users the maximum cost to upgrade to **SailMaker 1.10.2** will be an average of $700.00 per sail module, totaling to $3,500.00 AUD and for LE users will be an average of $520.00 per sail module, totaling to $2600.00 AUD

PlotMaker Upgrades from **1.9.5 to 1.10.0** will cost $950.00 AUD which will enable the user to produce PlotMaker files compatible with the PlotMaker 1.9.5 driven plotters, ASCII or optional NTV files can be sent way for cutting.
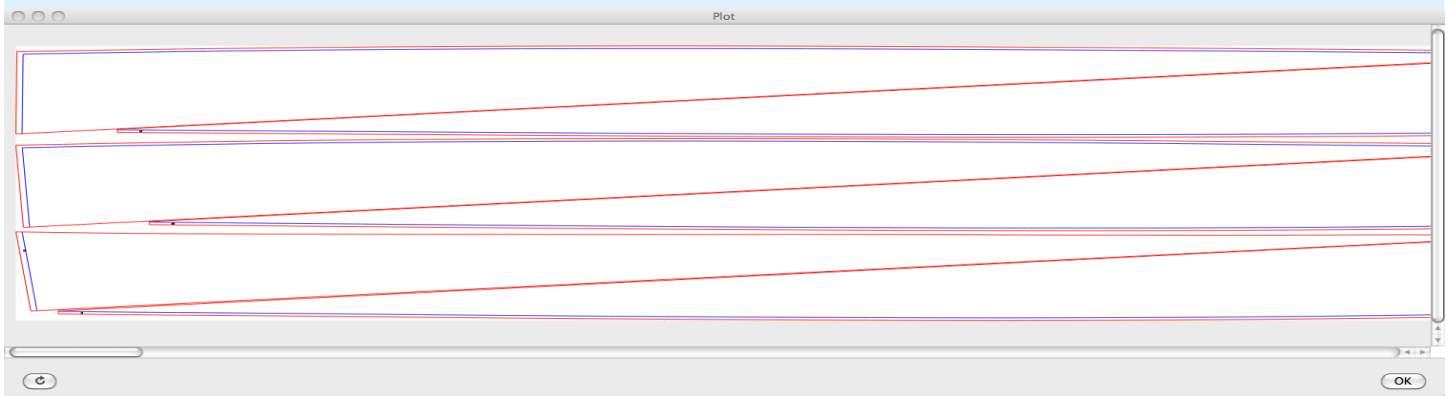

For sail lofts upgrading that may require driver files for their plotter/ cutter these will be a further $950.00 when the drivers become available.

For clients who already have SailMaker 1.10.2 or those of you that would like to upgrade to both SailMaker and PlotMaker we will happily offer a 20% discount off the above prices. This bring the cost of the Upgrades from SailMaker 1.9.5 – 1.10.2 $2,800.00, PlotMaker 1.9.5 – 1.10.0 for only $760.00. This offer is only available until the 31/7/2015.

Where to Now

SailMaker 1.10.0 has already had some improvements over the last 12 months is currently sitting at Version 1.10.2.

Sail Science has already started rewriting Driver files for the many different makes of cutters in the market place. The licensing has changed allowing us to have the one version with different drivers.

Plot

OK

Why use or upgrade Sail Science products.

To us this seems very easy to explain.

1). The first is that our products will enable to you to run and operate a Sailmaking business efficiently and effectively.

2). Our Sail design software SailMaker makes sail designing very easy. We know it is easier to use when compared with other sail design programs. SailMaker is not a marketing tool it is purely for designing sails, fast and efficiently.

3). Our nesting and cutting driver software is second to none.

4). Support. Ourselves being Sail Designers and Sailmakers are always available and can easily give support when required.

5). Value for money.

6). All our software is Mac compatible.

We hope that this update shows that Sail Science is moving ahead, we look forward to hearing from you.

For a demo of our latest version of SailMaker or PlotMaker please send us an email to info@sailscience.com.au

We look forward to hearing from you soon and don't forget the to receive a 20% discount, it is only available until 31st of July 2015.
